

ANANDAPPA KUKAMALLI

Java Microservices Developer

☎ +91-8861876367 ✉ anandappakukamalli@gmail.com 🔗 [linkedin.com/in/anandappa-kukamalli](https://www.linkedin.com/in/anandappa-kukamalli)

Professional Summary

Java Microservices Developer with 4 years of experience developing enterprise backend applications using **Java, Spring Boot, REST APIs, and Microservices**. Strong expertise in **Object-Oriented Programming, Linux-based deployments, and Agile (Scrum)** methodologies. Experienced in CI/CD pipelines, Kafka-based event processing, and collaborating with global stakeholders to deliver scalable, production-ready systems.

Skills

Programming: Java 8+, Object-Oriented Programming (OOP), Multithreading, Collections, Streams

Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Microservices, REST APIs

Databases: MySQL, SQL, Indexing, Query Optimization

Messaging: Apache Kafka (Consumers, Event Processing)

Operating Systems: Linux (Shell Commands, Bash, Logs, systemctl, Process Monitoring)

DevOps / CI-CD: Git, GitHub, Maven, Jenkins, CI/CD Pipelines, Build & Deployment Automation

Testing: JUnit, Mockito, API Testing

Tools: IntelliJ IDEA, Postman

Cloud: AWS (S3, EC2, RDS)

Practices: Agile (Scrum), Code Reviews, Debugging, Production Support

Experience

Tata Technologies Ltd, Pune

June 2022 – Present

Senior Java Developer

Java, Spring Boot, Spring MVC, Hibernate/JPA, SQL, AWS S3

- Designed, developed, and maintained **Java-based microservices** using **Spring Boot, Spring MVC, and Hibernate/JPA**.
- Built and exposed **RESTful APIs** for connected vehicle platforms handling high-volume telemetry data.
- Optimized **MySQL queries, indexing, and database workflows**, reducing response time and improving data processing efficiency.
- Integrated **AWS S3** for secure and encrypted storage of telemetry data, firmware packages, and diagnostic logs.
- Implemented centralized **exception handling, logging, and monitoring** to improve application stability in production.
- Troubleshoot and resolved development and production issues, ensuring high availability and system reliability.
- Participated in **code reviews**, enforced coding standards, and mentored junior developers.
- Collaborated with cross-functional and global teams in an **Agile (Scrum) environment**, participating in sprint planning, stand-ups, and retrospectives.
- Used **Linux systems** for application deployment, shell command execution, log monitoring, and production issue resolution.
- Worked on **CI/CD pipelines using Jenkins, Git, and Maven** to automate build, test, and deployment processes.

IFB Automotive Industries, Bangalore

Dec 2020 – Aug 2021

Creative Engineer

Quality Analysis, Documentation

- Performed quality inspections and analysis to ensure compliance with technical and functional specifications.
- Prepared technical documentation and reports to support process improvements and decision-making.

Projects

CVP Connected Vehicle | Java, Spring Boot, REST APIs, AWS S3 Bucket, Mysql

March 2024 – present

- Developed **Spring Boot microservices** for ingestion and processing of real-time and historical vehicle telemetry data for **PV, EV, and CV platforms**.
- Designed and implemented **RESTful APIs** to support vehicle analytics including trips, battery SOC, charging behavior, and fault diagnostics.

- Implemented backend services for data validation, transformation, and persistence using **Java and MySQL**.
- Integrated **AWS S3** for secure storage of large telemetry datasets, diagnostic logs, and supporting documents.
- Optimized data processing workflows to improve system performance and reliability in production environments.

IVIDMS and VSOH – Vehicle Information | *Java, Spring Boot, REST API's, Kafka, SQL* **Jul 2022 – Feb 2024**

- Developed backend modules for **FOTA (Firmware Over-the-Air)** updates enabling remote deployment of ECU/TCU software patches and images
- Implemented functionality for firmware file upload, validation, checksum verification, and version control
- Developed a Spring Boot consumer microservice to read high-volume messages from message brokers (Kafka).
- Implemented data validation, transformation, and enrichment pipelines to normalize incoming event data.

Awards & Achievements

- Awarded **Championship of the Month – Tata Technologies (Nov 2023)** for exceptional contributions
- **Best Project Team of the Quarter – 2025, Tata Technologies:** Recognized for outstanding team performance and successful project delivery.

Additional Information

- Comfortable working independently and adapting quickly to new tools and technologies.
- Strong communication skills with experience collaborating with global teams.
- Willing to work based on business needs and project requirements.

Education

B.E. ECE

AIET College, Kalaburgi, Karnataka

Graduated: 2019

CGPA: 7.3 / 10
